

End of Life Notification Radyne Branded Frequency Converters

We are committed to providing our valued customers with cost-effective products that meet the high-quality standards demanded by our community. There are occasions when we are no longer able to manufacture products due to various reasons. Our goal is to inform our customers of such issues and provide alternative solutions.

End of Life (EOL) Reason:

Due to parts shortages, production test equipment availability and the availability of next generation, more feature-rich products supplied by Comtech EF Data, we are announcing the End of Life for our Radyne branded 70/140MHz IF to RF converters.

Support:

We will continue to support repairs on the End of Life products until component/material obsolescence prevents us from doing so.

Products impacted and best fit replacements:

End of Life Product	Best Fit Replacement Product	Best Fit Availability
RCU101 1:1 Frequency Converter Redundancy Control Unit	DT-4500 Series Down Converters, UT-4500 Series Up Converters and redundant systems	Available Now
RCU108 1:N Frequency Converter Redundancy Control Unit		
SFC1275A Ku-Band Synthesized Frequency Down Converter		
SFC1450A Ku-Band Synthesized Frequency Up Converter		
SFC4200A C-Band Synthesized Frequency Down Converter		
SFC6400A C-Band Synthesized Frequency Up Converter		

Compatibility:

Products listed as the best fit replacement products have been engineered to be backwards compatible in the following ways:

- Best fit replacements will have similar capabilities although not all modes of operation may be available
- Best fit replacements may have the equivalent or better performance specifications as last time buy product
- Best fit replacements will NOT have the same MIB files and drivers may need to be edited to accommodate new MIBs
- Best fit replacements will NOT be allowed to mix with last time buy products on the same redundancy switch

Further Questions:

If you have further questions or require more information, please contact your sales representative.

Thank you.
