

## Caution

This information applies to connector P3B of the CDM-600 and CDM-600L or the 25-pin D connector of the CDM-550.

**Do not connect** to the following pins of the 25-pin data connector, they are reserved for use by the redundancy system.

Pins:	4	5	6	13	18	19	20	21	22	23*	25
-------	---	---	---	----	----	----	----	----	----	-----	----

\* Do not connect pin 23 unless it is intended for the terrestrial equipment to shut OFF the Tx Carrier.

If any of these pins on the modem are connected to the terrestrial interface, some of these symptoms may occur:

- 1) Transmit data does not transfer
- 2) The 9-pin EIA-232 remote control port does not function properly due to pin contention
- 3) Interferes with Request to Send and/or Clear to Send

Refer to the Connector Pinout and Cable Drawings sections of the applicable equipment manual for further information.

The information contained in this document supercedes all previously published information regarding this product. Product specifications are subject to change without prior notice.
