Overview
Comtech EF Data’s extensive experience in the design of outdoor RF transceivers led to the LPOD family’s efficient thermal and mechanical package. Recognizing the evolution of L-Band IF systems, the LPOD is designed to eliminate the traditional requirement for the modem to supply a DC power source and a 10 MHz reference to the BUCs and LNBs. The LPOD’s optional internal reference and LNB bias allow for a simplification of multi-carrier operation and provide cost-effective redundant solutions. The LPOD offers valuable features not found in other L-Band BUC products.

Optional Internal 10 MHZ Reference
With the optional high-stability, ovenized reference oscillator (OCXO) installed, one more signal is removed from the TX IF cable. This ensures optimum RF performance of the BUC by eliminating any reference degradation caused by IF combiners, interconnections or rotary joints.

Optional Single and Multi-Band LNB Support
The LPOD was designed with the evolution of L-Band systems in mind. No longer relegated to low power single carrier installations, L-Band IF topologies are now found in larger multi-carrier installations. A challenge presented by multi-carrier L-Band systems is the presence of DC and reference components on the TX/RX L-Band interfaces. The LPOD design, by default, eliminates the DC component from the TX IF and can eliminate the reference requirement with the optional internal OCXO. The LNB bias/reference option completes the solution by eliminating DC and reference signal requirements from the RX L-Band interface. We also offer a high-stability “Multi-Band” Ku LNB facilitating global Ku-Band downlink coverage controlled by the LPOD M&C.

Redundancy
Another challenge addressed by the LPOD topology is the increasing need for redundant L-Band RF solutions. With its internal power supply, internal reference and internal LNB bias capability, the LPOD offers a very cost-effective solution for 1:1 redundant TX and 1:1 redundant RX requirements.

Integrated Power Supply
All LPOD models have a self-contained power supply. This eliminates the requirement for the modem to supply the BUC voltage on the center conductor of the RF cable, simplifying multi-carrier operation and modem spares maintenance.

Data Logging Capability
To greatly enhance system maintainability, the LPOD line includes a built-in data logging capability. By recording critical operational parameters (such as temperature, output power, mute status, etc.) at time-stamped intervals, the user can quickly gather intelligence not only about the unit itself, but also about the unit’s operational environment.

Advanced FSK
The LPOD, when used with Comtech EF Data modems, provides valuable additional functionality utilizing the industry standard FSK communications channel. This feature offers full control of single thread and redundant systems from the modem front panel without additional cabling or cost. The LPOD can also be accessed from the Ethernet port of the modem and controlled via Embedded Distant-end Monitor and Control (EDMAC).

Hand-Held Controller Devices
A variety of hand-held controller devices are available. These include the LPODnet M&C Accessory Kit and the CLC-10 M&C Accessory Kit. Both are designed to access the monitor and control functionality of the LPOD family of products.

Model: PS1-20Ku, PS1-32Ku, PS1-40Ku, PS1.5-50Ku, PS1.5-60Ku, PS2-100Ku, PS2-125Ku, PS1-25C.X, PS1-32C.X, PS1-40C.X, PS1-50C.X, PS1-60C.X, PS1.5-75C.X, PS1.5-80C.X, PS1.5-100C.X, PS1.5-110C.X, PS1.5-125C.X or PS2-125C.X

Input Power Supply Requirements: 90 – 264 VAC, 47-63 Hz, Power Factor Corrected, .96 (48 VDC optional)

Gain Min. (Typical) All power levels: 70 (75 dB)

Gain Adjust 20 dB in 0.25 dB steps

Gain Flatness ±1.5 dB full band (optional ±2.0 dB full band (-50° to +55°C)) ±0.30 dB per 40 MHz (optional ±0.50 dB per 40 MHz (-50° to +55°C))

Gain variation over temp ±1.5 dB max., -40° to +55°C (optional ±2.0 dB max. (-50° to +55°C))

Input Return Loss 15 dB

Output Return Loss 19.1 dB (1.25:1 VSWR)

Noise Figure 10-15 dB typ., 20 dB max. @ 10 MHz

RF Mute Isolation -60 dBc min.

AM/PM Conversion 2° typ., 3.5° max. @ Rated P1dB

3rd Order Intermod. Level (2 tones, @ -3 dB Total Back Off from P1 dB (-6 dBc SCL), Δ 1 MHz) -30 dBc typ., -25 dBc Guaranteed

Spurious Level

Harmonics -50 dBc @ Prated - 3 dB

Carrier Related In-band -60 dBc min. @ P1dB

Non-Carrier Related In-band -60 dBm max. (Input Terminated)

LO Leakage -25 dBm max.

Group delay variation Linear ± 0.03ns/MHz

Parabolic ± 0.003ns/MHz²

Ripple ± 1.0 ns pk-pk

Notes:
1. All units also available as SSPAs only, without internal L-Band BUC (Freq RF in = Freq RF out).
2. Allow 1 dB degradation from 13.75 to 14.0 GHz and 6425 to 6725 MHz.
3. Available in PS1.5-50Ku/80Ku levels. Inquire for other power levels.

Data Logging parameters
Non-Volatile RAM: Capacity 30 days @ 90 minute intervals. Includes: RF Output Power, Mute Status, Heatsink Temperature, LNB Bias Current

Phase Noise (dBC/Hz) (with optional internal or equivalent performance external reference)

Typical (C/X/Ku) Spec (C/X/Ku)

Optional Internal Reference

Internal Reference 10 MHz (Can lock to modem supplied reference over a range of -5 dBm to +5 dBm at IF Input)

Frequency Stability ± 5 x 10⁻¹⁰ / day

± 1 x 10⁻⁶ (-40° to +55°C)

Optional LNB Bias/Reference

LNB Bias Voltage Software selectable tone on/off, 12/18V, 450mA max.

LNB 10 MHz Reference Output Level 0 dBm ± 5 dB

LNB Input/Output Return Loss 15 dB

LNB Input/Output Gain 10 dB ± 2 dB (950 – 1750 MHz)

LNB Input/Output Gain Flatness ± 1 dB (950 – 1750 MHz)

LNB Input/Output Isolation (Mute condition) 55 dB min.

Environmental & Physical

Temperature

Operating -40° to 131°F (-40° to 55°C) (optional -50° to 55°C or -40° to +60°C)

Storage -67° to 167°F (-55° to 75°C)

Humidity 100% condensing rain 2° per hour

Altitude 10,000 AMSL

Ingress Protection Designed for IP-66 (Dust tight, strong water jets)

Shock Normal commercial shipping and handling

Weight / Dimensions (height x width x depth (in. excluding connectors)) (Optional internal 17 lbs Nominal / or equivalent)

Notes:

1. Allow 1 dB degradation from 13.75 to 14.0 GHz and 6425 to 6725 MHz.
2. Available in PS1.5-50Ku/80Ku levels. Inquire for other power levels.
