Introduction

This is a release of firmware for the CRS-300 Switch system for operation with CDM-600 modems.

Features

- Added feature that allows the user to enable synchronizing the date and time of all connected modems to the date and time of the CRS-300 Switch. Remote command SDT=1 enables feature and SDT=0 disables it.

Issues Addressed In This Release

- Improved serial communications for remote commands to prevent port lockup.
- Fixed problem where one or more traffic modems would be incorrectly set to another modem's configuration during Sun Interference or power cycling.

Known Issue(s) In This Release

None.
