## **Introduction**

This is a release of firmware for the CRS-300 Switch system for operation with CDM-710 modems.

## **Features**

No additional features are added.

## **Issues Addressed In This Release**

- Fixed an issue where Switch would leave a traffic modem in serial remote mode when switching it offline and back online.
- Fixed an issue where a remote command sent through the Switch to a modem that was longer than 256 characters would cause the Switch to lockup comms between Switch and modems.
- Fixed an issue where a Switch that was bridging a faulted traffic modem would not backup the priority modem when faulted.

## **Known Issue(s) In This Release**

None.
