## **Introduction**

This is a release of firmware for the CRS-300 Switch system for operation with CDM-700 modems.

## **Features**

No additional features were added.

## **Issues Addressed In This Release**

- Switch could lock up remote comm. port requiring power cycle to fix.
- Switch would exhibit comm. losses to modems while modems were being polled directly via SNMP.
- Switch will now place redundant modem online with a TX fault if the traffic modem it is bridging has all three (RX, TX, and Unit) faults.

## **Known Issue(s) In This Release**

None.
