- Refer to Users Manual.

Defect Fixes

Initial Release

Compatible SNMP MIBS

MIB Name	Filename	Date
CMR-8500 Private MIB	FW-0000255.mib	07/17/2009

Known Issue(s) In This Release

- When setting up CMR8500 in redundant mode with interconnect cable CA-0000316. Primary encapsulator switches to backup fine, but when primary 8500 comes backonline traffic is halted for 30-50 seconds. For this time frame, no traffic passes through either encapsulator.
