INCREASE CAPACITY AND REDUCE THE COSTS
OF YOUR TRANSMISSION NETWORK!

MEMOTEC NETWORK OPTIMIZATION SOLUTIONS MAKE IT POSSIBLE!

Recent roll-outs of premium grade mobile services are increasing bandwidth requirements, and the fast pace of the technology changes means operators face more congestion issues and greater requirements for E1 capacity.

But infrastructure upgrades are not always possible.

Today, Memotec is redefining Cellular Backhaul Optimization into an integrated, future-ready path to new high value services.

Now Discover AbisXpress™

The **PLUG & PLAY** Path to 3rd Generation
Smart Abis Optimization

MEMOTEC
redefining network efficiency

DISCOVER AbisXpress™

3RD GENERATION PLUG & PLAY OPTIMIZATION SOLUTION

A FAST AND EASY WAY TO DEPLOY ABIS OPTIMIZATION ON ANY RADIO NETWORK

AbisXpress™ MEANS FASTER DEPLOYMENT OF OPTIMIZED RESOURCES FOR OVERALL COST REDUCTION

The proprietary nature of the Abis interface and the related sensitivity of the radios have often delayed the field deployment of Optimization and Compression solutions, thereby delaying access to revenues for Mobile Operators. And most of these solutions do not feature an all-IP evolution path. Memotec has the solution.

Plug & Play for Immediate Revenues

No more deployment delays for a better ROI, faster revenue generation and fewer operator constraints on optimization performance and integration with the operator's network.

Total Infrastructure Vendor Transparency

This new Memotec solution can be rapidly and easily deployed in ALL networks (GSM 2G, 3G UMTS, CDMA) without any performance trade-offs. As AbisXpress operates on the transmission level, it is independent of the Abis structure and protocol, therefore allowing for total infrastructure vendor transparency.

Future-Proof and Wireless Technology Agnostic: GSM 2G, 3G UMTS, CDMA

Federate and aggregate all new services & technologies into a single resource for the different access transmission technologies available today and in the future.

A FEW KEY FEATURES

- Connectionless environment (plug-and-play)
- Radio vendor/codec transparency (FR/EFR/HR/AMR) for Satellite and microwave/leased lines networks
- Wireless technology agnostic: GSM 2G, 3G UMTS, CDMA

AbisXpress™ is available in the Memotec CX-U and CX-UA Series.

A LONG TERM RELATIONSHIP

We believe the only way to build lasting relationships with our customers is by **maintaining a global presence and providing expert professional and technical services**. That is why our experienced team of experts is ready to help and support you around the clock, 7 days a week, worldwide.

Headquartered in Montreal, Canada, Memotec has offices around the world. By providing high quality and scalable solutions tailored to meet our customers' evolving needs, Memotec continues to redefine network efficiency with innovative thinking and practices. Memotec will continue with its leading role as an innovator in the evolving network optimization marketplace.

NETWORK EFFICIENCY. REDEFINED.
