

CEFD Quality Policy

As of January 2020, the CEFD Quality Policy has changed to the following:

Comtech EF Data is committed to the design, manufacture, and delivery of telecommunications products and services that meet or exceed our customer and regulatory requirements. We continuously improve our products and processes through coordination with customers, employees, suppliers, and stakeholders. We regularly review our quality objectives to enhance customer and business focus. We maintain a dedicated, competent workforce, and provide them with a safe work environment.

This revision was made primarily to emphasize a core process, Design, which was not mentioned in the previous version of our Quality Policy. It was also recognized that the company's Interested Parties, inputs towards the development of objectives, and the commitment to sustain a safe environment for our workforce should be acknowledged within the Quality Policy.

Dated: January 14, 2020

A handwritten signature in black ink, appearing to read "Frederick Cone", with a long, sweeping underline that extends to the right.

Frederick Cone
Vice President of Quality and Continuous Improvement
