## **Introduction**

This is a firmware upgrade for any previous release of MBT-4000B (base).

## **Features Added**

Added OFM remote command which can enable automatic muting of offline unit. Setting OFM=11 and OFM=21 will mute the unit when offline. Setting OFM=10 and OFM=20 will operate as previously released firmware and not mute the offline unit. These commands should be sent to both base units in a 1:1 redundancy system.

## **Issues Addressed**

Fixed TSC remote command to reset to zero after query.

## **Known Issues**

None.
