Introduction

This release fixed an issue,

Features

1. None

Issues Addressed In This Release

1. Fixed serial communications hang-up issue in redundancy with FSK enabled from a disabled state or disabled from an enabled state. This only happened in redundancy configuration not in single-thread case. However without cycling the power, serial communications will come back as soon as FSK is enabled into the CSAT in locked-up scenario.

Known Issue(s) In This Release

1. None.
